### Release of the X2 PIRATE 8031 tempered glass pc enclosure

Maarheeze, The Netherlands – X2 is pleased to introduce the official release of the PIRATE 8031 tempered glass PC enclosure. This new metal chassis with tempered glass front and side panels is targeted to the pc enthusiast, pc Modder and pc gamer who loves to play with computers and show off their hardware. With ample room for up to 5 drives and 7 expansion slots for the installation of long graphics cards ( up to 390mm length VGA card ) large CPU cooler ( up to 180mm height clearance) and superior cooling through the 7x 120mm fan mount locations throughout this chassis. Already included are 3 multi-LED red cooling fans in the front. The PIRATE 8031 offers easy upkeep like tool-free removal of the glass side and front panels. Hard drive and SSD installation made easy by two ABS brackets on de side of the power supply chamber. Considerable options for gaming peripheral connections through the three USB3.0 ports and HD Audio jacks. The chassis is constructed out of 0.60mm SECC steel and facilitates neat cable routing and good system airflow. The power supply unit is separated and enclosed on the bottom of this structure for reduced noise levels and improved cooling. Show off your cool components, RGB cooling and water or air coolers through the glass window side panel on the left side and front panel. X2 - All geared up!
